

# CURRICULUM VITAE

I have done some volunteering where I gained valuable experience in the work environment. I have strong attention to detail and inclination for problem-solving. To build upon this interest, I have recently graduated from a coding Traineeship as a full stack developer including completing 2 real-world projects successfully to specification using a wide range of programming languages. I have excellent customer service, communication, teamwork and organisation skills and a strong work ethic. I enjoy learning new concepts, and problem solving. I am looking forward to establishing a career in the development field where I can prove myself as an asset.

## CODING TRAINEESHIP

**IT Career Switch Ltd**  
Coding Traineeship – Full stack developer  
1-year program

During the traineeship I had to demonstrate a very competent level of the following programming languages and technical skills

- HTML5, CSS3, JavaScript
- PHP, SQL, React, jQuery
- Java, Python, C#, Node.js
- Command Line Git, GitHub
- Remote API access

## ADDITIONAL TECHNOLOGIES:

- Bootstrap, PostgreSQL, Express.js, Redux, Linux, Apache, MySQL, Powershell, GitBash, Visual Studio Code, PgAdmin, PHPMyAdmin, Postman, Netlify, Slack

## DEVELOPMENT EXPERIENCE:

Below are the two briefs of development projects I completed with IT Career Switch which can be found in my bio: <https://kiransundal.co.uk/>

### **Portfolio Project #1: “Gazetteer”**

The specification was to reply to a website specification for a map-based app to provide information on countries – with a focus on a “mobile-first” development. Preferably using a framework, to then develop HTML, CSS and JavaScript with JQuery modules that use PHP server-based components to source data from third-party APIs (Geonames, OpenWeather). The solution is assessed on its delivery to specification, functionality, and usability.

### **Portfolio Project #2: “Company Directory”**

A more rigorous reply to this specification was required as a user requirements document was needed to be prepared which, when signed off, triggers the release of SQL allowing to develop a “mobile first” application to maintain a company personnel database (MySQL). Sign-off is only achieved upon the student supplying an independently witnessed document providing confirmation of the system’s ability to perform error-free.
